

I wish to support the FISTS petition, RM-10811. I feel the current requirements for an amateur license are too easy. The code requirement should be retained as a skill and art form. The 5 wpm test is too slow for the higher class of license. I also feel the FCC has given too much responsibility to entities outside the FCC. Control should be retained by the FCC over testing material and methods. Thank you for your time and please protect this valuable resource.
